

Avantiquo

AI-native Business Operating System

One platform to run finance, operations, customers, people, supply chain, compliance and AI execution across multiple companies and industries.

Live product across hospitality, service, supply chain and compliance workflows

CREATE. OPERATE. SCALE.

The operating system problem

Most businesses still run on disconnected tools instead of a real operating system.

-  Disconnected apps, spreadsheets and chat threads
-  Critical know-how lives in the owner's head and staff memory
-  Generic software records data but does not run the operation
-  Every extra tool adds cost, fragmentation and control risk

 The result: slow execution, weak visibility and no real operating intelligence.

Avantiqo is the AI-native operating layer

One platform to ask, decide, execute and expand across the business.

Organization intelligence

A conversational AI layer that understands the organization and opens workspaces or prepares actions.

Domain workspaces

Commercial, Operations, Supply Chain, Finance, People, Compliance, Documents and Administration.

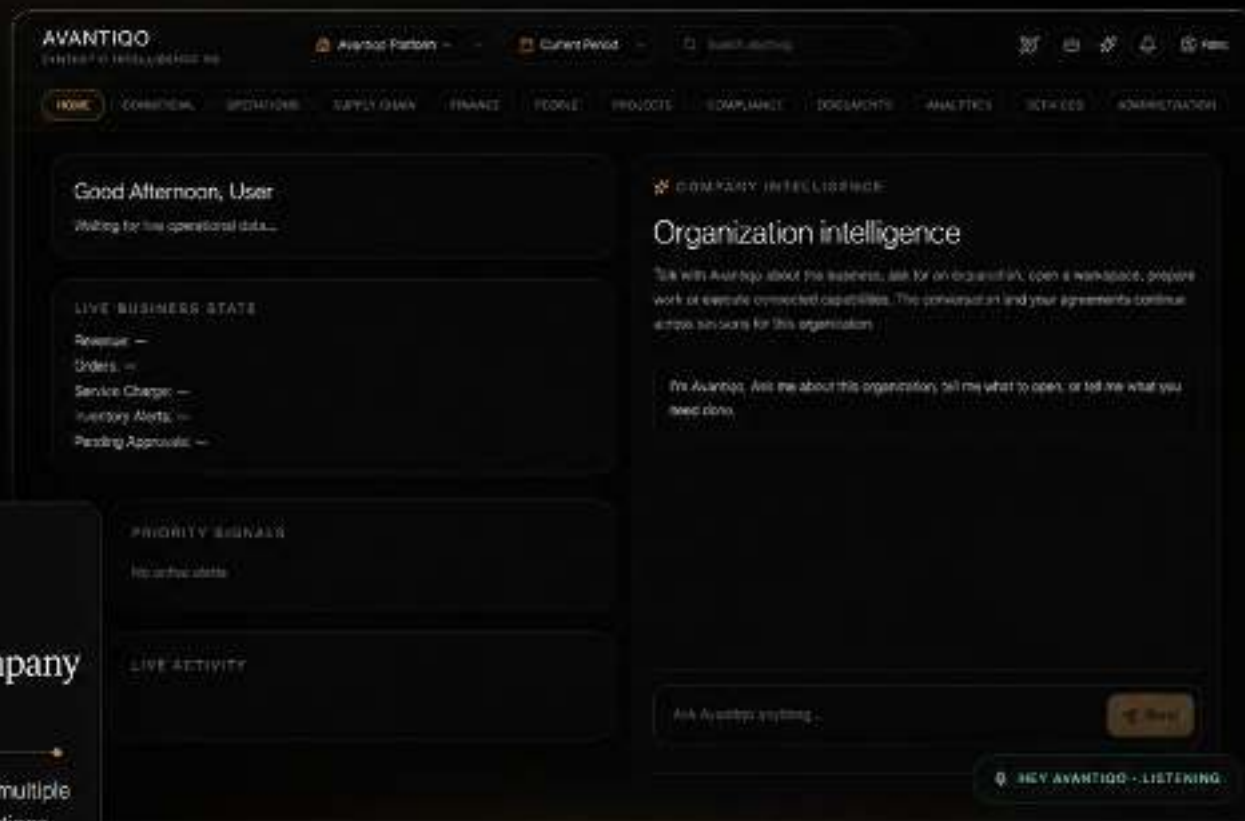

Connected execution

The platform is designed to move from insight to action, not just reporting.

Multi-company control

Built to manage multiple businesses, locations and operating contexts from one system.

ONE PLATFORM. ALL CORE DOMAINS.

Commercial

Operations

Supply Chain

Finance

People

Compliance

Documents

Administration

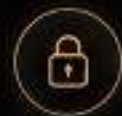

One platform. Many workspaces.

Each workspace is a controlled business capability within one shared operating system.

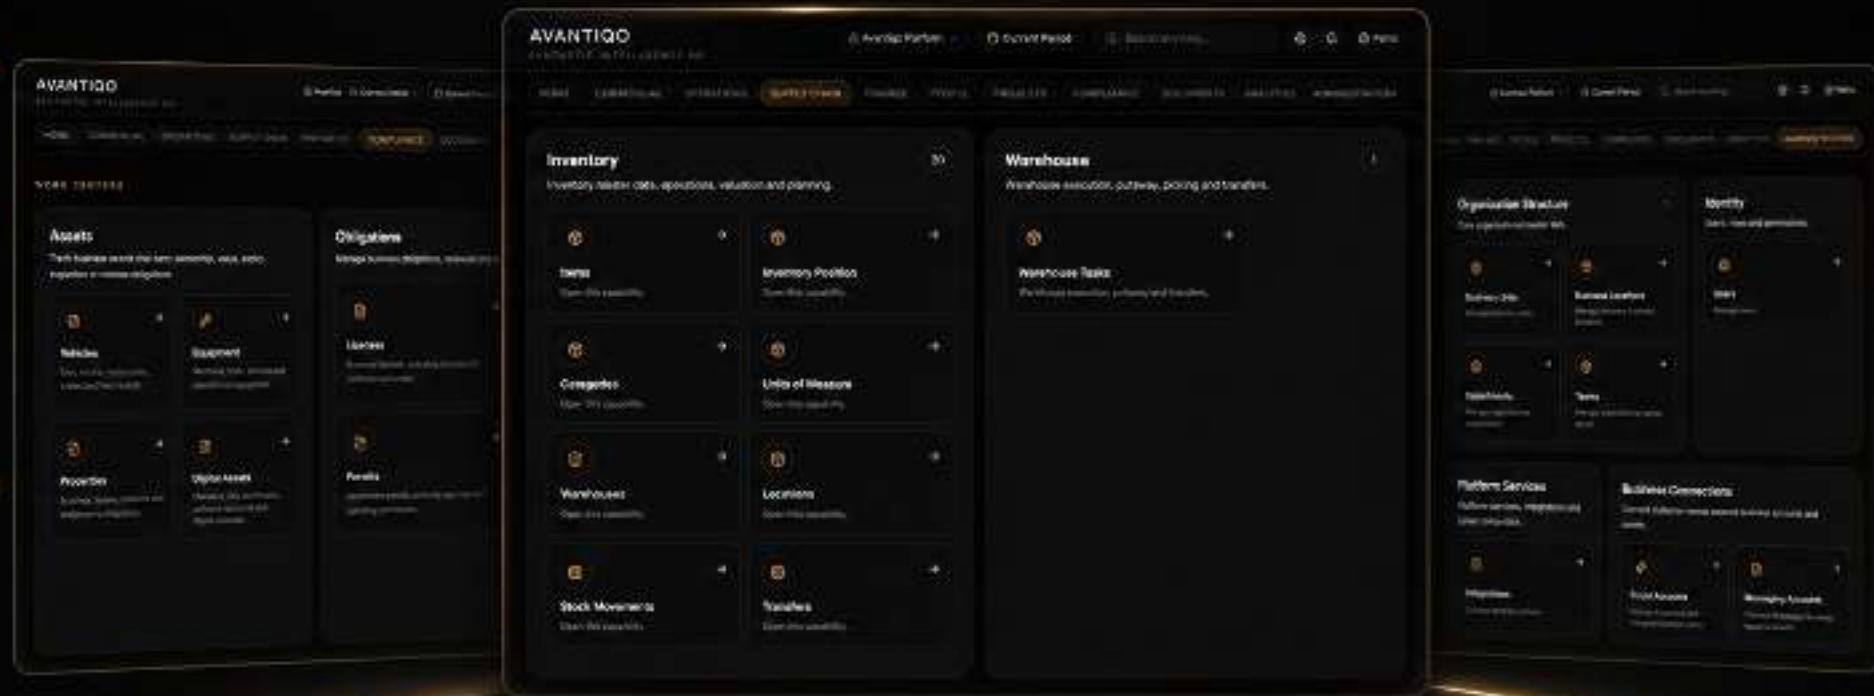

One identity,
one search,
one business context

A unified experience
across every workspace.

Controlled
capabilities
by domain

Governed access
and data boundaries
by business area.

Reusable
architecture
for multiple
industries

Built once.
Configured many.
Scaled everywhere.

A shared AI layer
across every
workspace

Context-aware intelligence
that works where
your teams work.

 Analytics

Already live across real workflows

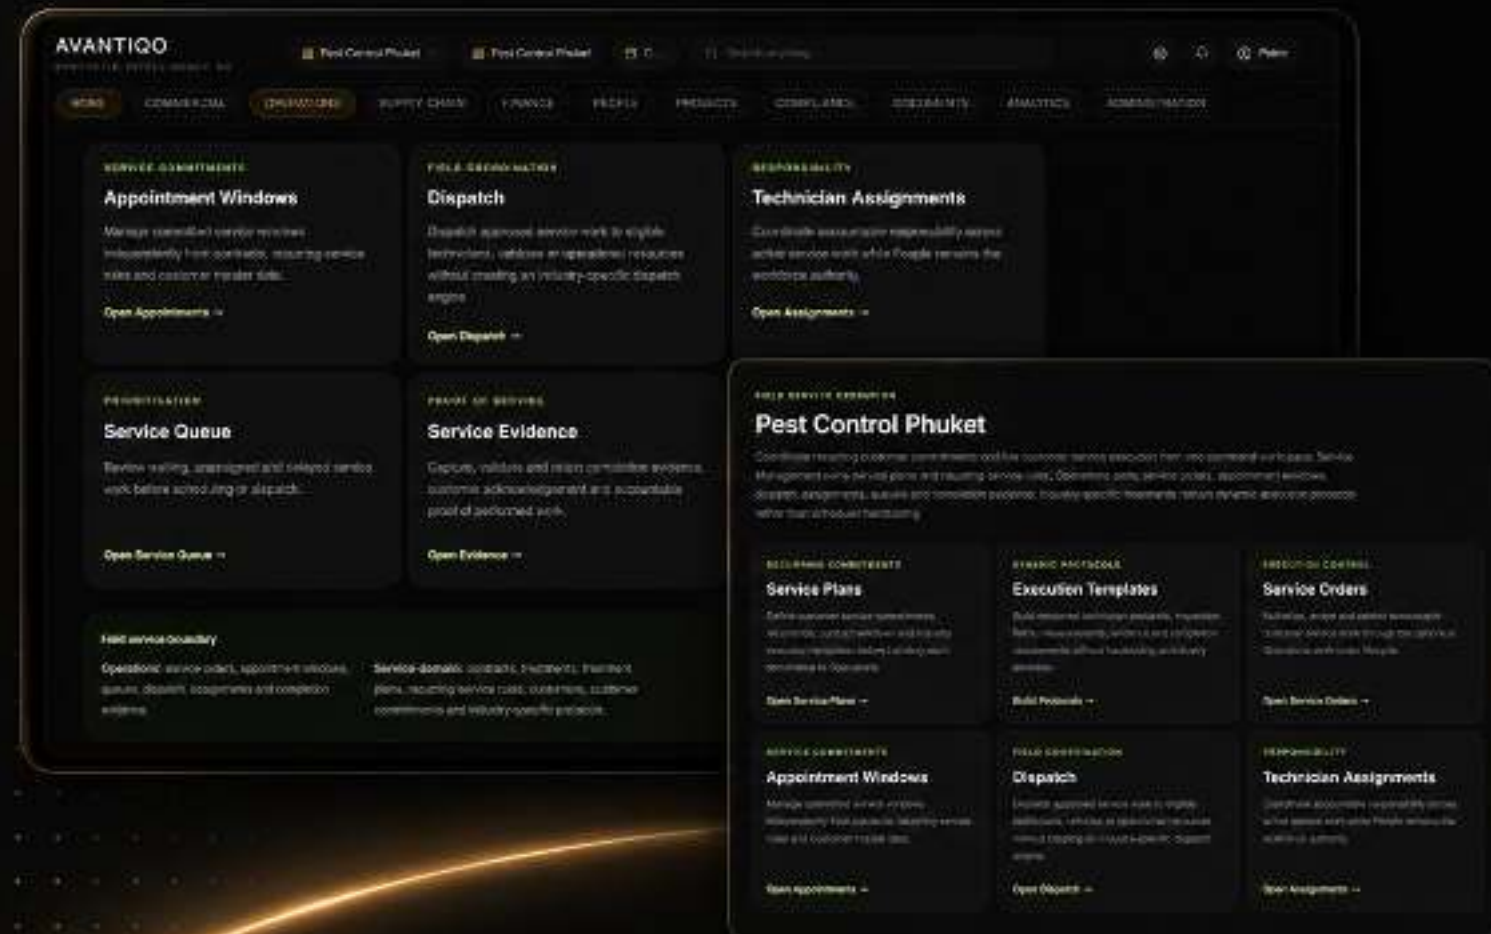

These are product screens from the working system, not concept illustrations.

Avantiqo is already being shaped through real operating environments and real workflow depth.

Vertical entry, horizontal expansion

We land with a real operating solution, then expand across the company.

1. Solve one mission-critical workflow

Service plans, service orders, dispatch, assignments and proof of service.

2. Expand into adjacent control layers

Commercial, people, inventory, finance and compliance.

3. Become the business operating system

One platform, one AI layer, one data context across the organization.

Same core engine. Industry-specific operating solutions.

A horizontal platform with vertical go-to-market

The same operating core can power very different industries.

- 

Where we start

 - ✓ Restaurants & hospitality
 - ✓ Field service and local service companies
 - ✓ Owner-led and multi-location operators

Where the platform can go

 - ✓ Healthcare operations
 - ✓ Retail and service groups
 - ✓ Multi-company organizations
 - ✓ Back-office and shared-control environments

Manage Operations · All Operations Tools · Access Control

INSTALLED OPERATIONAL SOLUTION

Restaurant Operations

Run service from floor and ordering through kitchen production, payment and shift control.

RB

Restaurant Control

Take restaurant command workspace and service overview.

SB

Stationary POS

Sell, manage orders, take payment, issue receipts, control cash and shifts, and coordinate full-service take-out workspace.

MB

Mobile Service

Take orders and manage guest service from the floor using the restaurant service adapter.

KB

Kitchen

Run kitchen orders, preparation and production state.

INSTALLED OPERATIONAL SOLUTION

Healthcare Operations

Coordinate patient flow, appointments, admissions, beds, pharmacy and clinical support operations.

SB

Healthcare Control

Open the healthcare operating dashboard.

AB

Appointments

Manage scheduled patient service and clinical workflows.

AD

Admissions

Coordinate patient admission and discharge workflows.

PH

Pharmacy

Run pharmacy service and medication inventory.

Every operating business still needs the same control layers: customers, operations, finance, people, compliance and execution.

Land small. Expand across the company.

The business model combines software, setup and AI-driven execution.

01 REVENUE MODEL

Subscription SaaS

Recurring access to organizations and workspaces.

Implementation & setup

Configuration, onboarding and integrations.

AI execution usage

Automation, publishing, communications and future agent actions.

02 GO-TO-MARKET

- Founder-led sales into real operating businesses
- Start with one vertical solution or one critical workspace
- Expand account value across commercial, operations, finance and administration

Own operating environments provide high-quality real-world test beds.

Built from **operator** pain, not software theory

Avantiqo is being shaped inside real businesses before broad scale.

Built while running real operating businesses and teams

Knows the pain of fragmented workflows, weak control and disconnected software

Designed Avantiqo as a system for execution, accountability and scale

Using real operating environments to sharpen product depth before growth

Patric Vallgård

FOUNDER

Why now

AI can move from reporting to action

Businesses want fewer systems and more control

Connected workflows create stronger operating leverage

Raising \$500k to accelerate Avantiqo

Capital to deepen the product, prove repeatable deployments and expand execution capability.

RAISE

\$500,000

TARGET VALUATION

\$4.0M

• USE OF FUNDS

Product & engineering

Deepen core workflows and platform reliability.

Lighthouse customer deployments

Prove repeatable value across key use cases.

AI execution adapters and automation

Expand integrations, automation and intelligence.

Sales, pilot delivery and working capital

Grow pipeline and ensure execution velocity.

• NEXT MILESTONES

Expand product depth across core workflows.

Convert pilots into multi-workspace accounts.

Strengthen AI operating intelligence.

Prepare for the next fundraising.

CREATE. OPERATE. SCALE.
